Hi, I'm a developer who loves to
create beautiful things using
clean & elegant code.

A little bit about me

I have a little confession to make, I'm a self-confessed Tech Geek! I love gadgets and all things tech related. A Canadian by birth I currently live in London England where I've called home for the past 17 years with my very supportive husband. My background has mainly been in Human Resources within Corporate Finance but I've always loved the technical aspects of my job. Any excuse to create something techie I was all over it! Whether it would be an Excel database or a SharePoint site.

My journey into code started when I took a foundations course for Mobile App Development. It was there I was introduced to a bit of HTML and from then on I was hooked on code! I'm now pursuing my passion as a Front End Web Developer utilising my organisational skills and attention to detail to write clean and elegant code. Here I can help my clients and friends create a website that suits their specific needs and creativity.

How can I help you?

Specialties

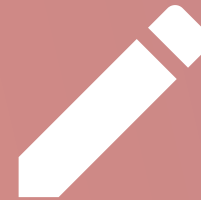

Hand-Coded HTML

My focus is writing clean, well-formatted, semantic HTML5 by hand to make sure that the content is easy to read, easy to collaborate, trouble-shoot and accessible.

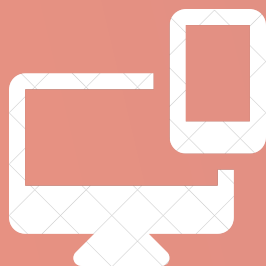

Well-Organised CSS

I pride myself on writing CSS that is easy to read and build on. I focus on keeping my CSS lean and fast to load, and I make it a habit to stay up to date on current best practices.

Ease Converting Designs into Code

I can create high fidelity wireframes so you can see how your website will look like before we start. Have a designer's PSD already, no problem, I can quickly & accurately convert it into a webpage that is pixel-perfect match.

Responsive Design

Do you currently have a website you love but it isn't responsive? I can convert a static site to a responsive site so it's optimised for mobile devices.

Content Management Systems

Fancy a website you can update yourself? I can design and build a website for you in a CMS then teach you, how to update it yourself.

Social Media

Need help with building your social media platforms such as a Facebook Business page? I can help you create business social media platforms that are linked to your website.

Watch this space, as more features are coming soon!

Check out some of my work.

Like what you see?

Let's meet up for a cup of coffee or tea.
